Forecast for Saturday 20 Aug 2022

Weather: Low cloud will form over the hills during the early hours giving misty conditions at times. This cloud lifting after dawn to allow occasional sunny intervals with scattered morning showers tending to become more isolated. Mostly dry later in the afternoon and through the evening.

Chance of cloud-free hill tops above 600m: 40% rising to 80% by midday.

Low cloud and visibility: Periods of cloud above 600m lifting to patches above 900m through the morning. Generally very good visibilities with excellent air clarity allowing distant hills to be clearly visible. Locally very poor in cloud with temporary reductions in any showers.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

A blustery day, especially over the highest summits. Be prepared for some difficult walking conditions on exposed ridges and the highest summits.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Fri 19 Aug 2022	5mm	5mm	12.4mm

Forecast for Sunday 21 Aug 2022

Weather: A rather cloudy picture for most of the day with occasional drizzly showers, these possibly quite heavy at times. Thickening cloud may bring more persistent periods of rain and drizzle by the evening, however there is some uncertainty regarding the timing of this arrival.

Maximum wind: Southwest 20 mph, gusting 30 mph at times.

Chance of cloud-free hill tops above 600m: 60%.

Low cloud and visibility: Periods of cloud above 700m. Becoming extensive above 600m during the evening. Mostly good at low levels during the daytime but extensively very poor in cloud. Occasionally moderate in rain showers and becoming widely poor or very poor by the evening.

Temperature: **Valleys:** Plus 12 Celsius rising to plus 19 Celsius.
At 600m: Plus 14 Celsius.
Freezing level: Above the summits.
